DETAILED ACTION

- This action is responsive to the following communication: RCE filed on 6/26/08, BPAI decision on appeal dated 5/14/2008, and authorized examiner's amendment on 7/7/08.
- Claims 7-8, 10-12, 17-20 are now allowed; claims 1-6, 9, 13-16 have been canceled.

Response to Arguments

Applicant's arguments, see page 6, filed 6/26/08, with respect to claims 8 & 17 have been fully considered and are persuasive. The prior art rejection of claims 8 & 17 has been withdrawn.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Allison Tulino on 7/7/08.

Please amend the following claim:

7. (Currently Amended). A ~~printing system~~ printer device according to claim 8,

Wherein said selected intermediate code generator further outputs information of bandwidth and bandheight compatible with an intermediate code, and

Wherein said printer restructures said storage area on the basis of information of bandwidth input through the intermediate code generator, and controls said rasterized print image information to be stored in said prescribed storage area restructured in band units.

Allowable Subject Matter

- Claims 7-8, 10-12, 17-20 are allowed; renumbered as claims 1-9.

• The following is an examiner's statement of reasons for allowance: The cited prior arts (EP 820004 to Suzuki et al; US 6441919 to Parker et al) of record teach a printer device and/or method for converting printer language image data into raster image data ready for printing, but fail to teach and/or suggest a selecting means/method for selecting an intermediate code rasterizing means on the basis of intermediate code identification information input from the intermediate code generating means, controlling print image information rasterized by said selected intermediate code rasterizing means to be stored in a prescribed storage area of said printer device, and printing on the basis of said stored print image information, in said printer device" and in combinations of other features" as cited in independent claims 8 & 17 (renumbered as claims 1 & 6 respectively). The examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of prior arts that teaches the above limitations and in combinations of other features cited in claims 8 & 17 (renumbered as claims 1 & 6 respectively).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to THIERRY L. PHAM whose telephone number is (571)272-7439. The examiner can normally be reached on M-F (9:30 AM - 6:00 PM).
